Second-year Computer Science student at the University of Zambia and founder of Akivara Technologies, a venture studio building software for real-world African infrastructure constraints — intermittent connectivity, basic devices and limited cloud access. Full-stack developer comfortable across React, TypeScript, Python and offline-first mobile architecture, with hands-on experience shipping projects end to end, from idea to launch.

EXPERIENCE

Founder — Akivara Technologies
Jan 2025 – Present | Lusaka, Zambia (Remote)

- Led development of **UniFlow** (offline-first academic platform: local RAG, on-device OCR, Wi-Fi Direct/BLE mesh) and **Agri-Flow AI** (AI-powered agricultural logistics with USSD/SMS access).
- Presented both products at the Africa Digi Free Competition (LibertyCon Africa) and pitched Agri-Flow AI at ZNRAC.

Independent Developer — Self-employed
2025 – Present | Lusaka, Zambia

- Building **ZedShelf**, a Zambian student marketplace (React, TypeScript, Supabase) with real-time messaging and Kwacha pricing.
- Built **SchoolCore Zambia** (Next.js, Supabase), a Startech Communications site, and an automated Instagram content pipeline (GitHub Actions, Python, Anthropic API).

Printing & Design Assistant — Dumela General Dealers
2023 – 2024 | Lusaka, Zambia

- Handled customer printing, typing, binding and toner/ink refill orders at an internet café/print shop.
- Designed posters, flyers and quotation/receipt books for local business customers.
- Built strong customer service and time-management habits ahead of starting university.

EDUCATION

BSc in Computer Science — University of Zambia (UNZA)
Jan 2025 – Present (2nd year) | Lusaka, Zambia

- Coursework: Computer Systems, Discrete Structures, Computer Architecture, Database Systems, Java Programming

SELECTED PROJECTS

ZedShelf — Zambian student marketplace with UNZA classifieds, real-time messaging & Kwacha pricing
React, TypeScript, Vite, Supabase, Tailwind CSS

UniFlow — Offline-first academic platform: local RAG, on-device OCR, mesh networking
React Native, SQLite, Wi-Fi Direct/BLE

Agri-Flow AI — AI-powered agricultural logistics platform for smallholder farmers
TensorFlow Lite, React Native, Supabase, USSD/SMS

SKILLS

Languages	JavaScript, TypeScript, Python, Java, Kotlin
Frontend	React, React Native, Next.js, Tailwind CSS, HTML/CSS
Backend	Node.js, Express, Supabase, MySQL, PostgreSQL
Tools & Cloud	Git, GitHub Actions, Figma, Vercel, Netlify, Docker, Azure
AI Tools	Claude Code, ChatGPT, Cursor, Antigravity, Gemini

CERTIFICATIONS & TRAINING

- Cisco IT Essentials 8 — Certificate of Completion
- Cisco Networking Essentials
- Microsoft Certified: Azure AI Fundamentals (AI-901) — In Progress
- FNB App Academy – In Progress

COMPETITIONS

- ZNRAC — Pitched Agri-Flow AI
- Africa Digi Free Competition, LibertyCon Africa 2026 — Presented Agri-Flow AI & UniFlow
